Building the Foundation

Resource Management

The core of the First Age revolves around resource management You need to build a robust economy to fuel your civilizations growth Heres a breakdown of essential resources and strategies

Food

The backbone of your civilization food is used to train villagers and create your initial military force Focus on gathering food from berries and sheep early on

Wood

Used to build basic structures including your Town Center houses and military buildings Prioritize chopping down trees close to your starting location

Gold

The essential currency for purchasing upgrades and advanced units Mine gold early on and secure additional sources as your population grows

Stone

Used for constructing defensive structures and upgrades including walls and towers While stone is less important initially secure a source early on to prepare for future defensive needs

Building Priorities

Your initial build order is crucial for setting the stage for a strong First Age A common and effective strategy involves the following steps

- 1 Villager Rush Begin by quickly building a few villagers and assigning them to gather food Aim for 34 villagers before expanding
- 2 Town Center Build your primary Town Center to house your growing population and provide the infrastructure for expansion
- 3 Houses Construct enough houses to accommodate your villagers Houses provide housing for your villagers and allow your population to increase
- 3 4 Mill The Mill allows you to gather food from berries more efficiently boosting your food production early on
- 5 Additional Villagers Continuously train new villagers to exploit additional resources and build your economy
- 6 Military Building Consider building a Barracks or Archery Range early on to start training a small force for scouting or defense

Civilization Choice

Shaping Your Strategy

The civilization you choose in the First Age can dramatically impact your approach Each civilization has unique strengths and weaknesses influencing your build order and unit composition

Example The Goths The Goths with their Bloodlines technology can achieve a significantly faster villager production rate This allows them to build a larger economy and military force early on giving them a strong advantage in the First Age

Unit Composition

Building Your First Army

Your early army should focus on cheap and effective units that can defend your base and scout the map

Villagers

While primarily designed for resource gathering villagers can be used as a basic defensive force early on

Spearmen

A solid starting unit spearmen are effective against archers and other light infantry

Archers

Primarily used for ranged attacks archers can harass enemy units and provide long range defense

Map Awareness

Understanding Your Surroundings

The map plays a crucial role in your First Age strategy Scout your surroundings early on to identify Resources Locate additional sources of food wood gold and stone to secure your

economy Enemy Location Gain an understanding of your opponents starting position and potential attack routes Strategic Points Identify locations for potential future expansion defensive positions or choke points Ethical Considerations in the First Age 4 Exploiting Weaknesses Its important to be aware of the potential for exploiting your opponents early mistakes or vulnerabilities This can lead to a significant advantage and potentially unfair outcomes Rush Tactics Aggressive tactics like rushing with a large army of spearmen or archers can overwhelm your opponent early on potentially creating an imbalance in the game Harassment Constantly attacking your opponents villagers or buildings can hinder their development and lead to an unfair disadvantage Conclusion Mastering the First Age of Empires is crucial for success Building a strong economy training effective units and establishing a strategic advantage are essential for surviving and thriving in this early stage Remember to focus on efficient resource management prioritize your build order and adapt to the changing dynamics of the map and your opponents actions By mastering these skills you can lay the groundwork for a dominant victory in the later stages of the game
