in this bestselling book one of america s most distinguished psychologists crystallises the great progress that has been made in the development of the techniques and basic philosophy of counselling carl rogers gives a clear exposition of procedures by which individuals who are being counselled may be assisted in achieving for themselves new and more effective personality adjustments contemporary psychology derives largely from the experimental

laboratory or from freudian theory it is preoccupied with minute aspects of animal and human behaviour or with psychopathology but there have been rebels including carl rogers gordon allport abraham maslow and rollo may who felt that psychology and psychiatry should aim higher and be more concerned with growth and potentiality in man the interest of such a psychology is in the production of harmoniously mature individuals given that we all have qualities and possibilities infinitely capable of development successful development makes us more flexible in relationships more creative and less open to suggestion and control this book is a mature presentation of the non directive and related points of view in counselling and therapy the final chapter presents a formal treatment of the psychological theory which is basic to the whole client centered point of view not only in counselling but in all interpersonal relations this edition marks the 70th anniversary of first publication and includes a new introduction from rogers granddaughter frances fuchs phd

john griffin presents an exercise prescription model that focuses on the unique body types and needs of clients this revised edition includes case studies reproducible hand outs questionnaires and tables to enhance teaching and learning

human beings have vast resources for social personal and spiritual growth this project presents some of the thoughts ideas and notions of writers who have dedicated themselves to an approach that facilitates the emergence of the self that one truly is the differing perspectives reflect a deep commitment to a process that is in many ways indefinable yet each writer presents a snapshot of a process that is incredible to behold and witness

peggy natiello s collection of work has become a favourite amongst students on person centred courses throughout the uk it is a scholarly much referenced work on collaborative power and gender issues

in the quiet corners of countless therapy offices around the world a profound transformation has been taking place for decades it s not marked by dramatic breakthroughs or sudden revelations but rather by something far more subtle and powerful the simple act of one human being truly seeing and accepting another this is the essence of client centered therapy a revolutionary approach that turned the traditional therapeutic relationship on its head and forever changed how we understand healing growth and human potential to understand the magnitude of this shift we must first journey back to the early days of

psychotherapy when the therapist was viewed as the all knowing expert wielding interpretation like a surgeon s scalpel cutting through layers of defense to expose hidden truths the client was seen as a collection of symptoms to be analyzed patterns to be decoded and pathologies to be cured the power dynamic was clear the therapist knew what was wrong and how to fix it while the client s role was to comply resist or transfer their feelings onto this authority figure into this landscape stepped carl rogers a soft spoken psychologist whose ideas would fundamentally challenge everything the field thought it knew about therapeutic change rogers proposed something radical what if the client not the therapist was the true expert on their own experience what if healing didn t come from brilliant interpretations or clever interventions but from the simple provision of certain relational conditions that would allow the client s natural tendency toward growth to flourish this wasn t merely a theoretical adjustment it was a complete reimagining of what it means to help another human being rogers observed that when people felt truly understood genuinely accepted and met with authentic presence something remarkable happened they began to trust themselves more deeply to explore their experiences more honestly and to discover their own capacity for insight and change the therapist s job wasn t to provide answers but to create the conditions in which the client s own wisdom could emerge

intended to be a resource for individuals who are working directly with children and adolescents in diverse applied and clinical settings the first section contains perspectives on the field the second section contains an overview of assessment issues in child and adolescent psychotherapy the third section offers a state of the art overview of major therapeutic approaches that represent current practice in child and adolescent psychotherapy the last section includes chapters that are related to major assessment and therapeutic practices a longwood professional book

this clear and concise text provides an introduction to the concept of disability and explores the experiences and consequences of it international experts discuss the role of service providers in relation to people with disabilities and thoroughly examine the relationship between a person with a disability and his or her social and physical environment offers concrete and practical suggestions for people who work with people with disabilities

highly respected and used in the field s top programs current psychotherapies provides students of counseling psychology and social work with an

authoritative treatment of the major systems of psychotherapy each contributor is either an originator or a leading proponent of one of the systems and each presents the basic principles of the system in a clear and straightforward manner discussing it in the context of the other systems
