eating apes is an eloquent book about a disturbing secret the looming extinction of humanity's closest relatives the african great apes chimpanzees bonobos and gorillas dale peterson's impassioned exposé details how with the unprecedented opening of african forests by european and asian logging companies the traditional consumption of wild animal meat in central africa has suddenly exploded in scope and impact moving from what was recently a subsistence activity to an enormous and completely unsustainable commercial enterprise although the three african great apes account for only about one percent of the commercial bush meat trade today's rate of slaughter could bring about their extinction in the next few decades supported by compelling color photographs by award winning photographer karl ammann eating apes documents the when where how and why of this rapidly accelerating disaster eating apes persuasively argues that the american conservation media have failed to report the ongoing collapse of the ape population in bringing the facts of this crisis and these impending extinctions into a single accessible book peterson takes us one step closer to averting one of the most disturbing threats to our closest relatives

includes information on more than 1 500 goddesses from australia africa north and south america asia europe cover lists news events population figures and miscellaneous data of an historic economic scientific and social nature
